The Deep State is Very Real… It has Officially Turned on Joe Biden

The special prosecutor's **REPORT HAS FOUND** that Joe Biden violated the law by willfully retaining, improperly handling and even *disclosing* classified information. But not to worry: He is mentally too diminished to be held accountable for doing so.

Joe Biden is a national security risk to the nation, to the Democrats he is a political liability. They know that the American public can not tolerate a dementia patient in the White House.

So Robert Hur releases his damning report on Joe Biden's classified documents case. Though he lets Biden skate on criminal charges, he paints "old Joe" out to be a mentally incompetent old man who can't remember what office he currently holds. This report is by design. To set up his ouster.

We go through the most important clips from Joe Biden's disastrous speech last night, including the one line no one is talking about.

Joe Biden threw a tantrum during a private meeting with Democrats after Special Counsel Robert Hur's report criticized him for his poor memory.

Joe Biden STOLE SCIF-designated classified documents and improperly stored them at the Penn Biden Center, his Delaware garage, his Virginia home, and his lawyer's Boston office.

Hur found that Joe Biden "willfully retained" classified information, however, he decided not to charge him. Hur said there is evidence Biden retained classified notebooks, "knowing he was not allowed to do so."

The Justice Department defended not bringing charges against Biden because he's a "sympathetic, well-meaning, elderly man with a poor memory."

"We have also considered that, at trial, Mr. Biden would likely present himself to a jury, as he did during our interview of him, as a sympathetic, well-meaning, elderly man with a poor memory. Based on our direct interactions with and observations of him, he is someone for whom many jurors will want to identify reasonable doubt. It would be difficult to

convince a jury that they should convict him – by then a former president well into his eighties – of a serious felony that requires a mental state of willfulness." according to Hur's report which was reviewed by *The Gateway Pundit*.

Biden forgot when he was Vice President and also couldn't remember when his son Beau died.

Joe Biden was furious over the special counsel's report highlighting his poor memory.

According to the Washington Post:

> *Privately, Biden was also furious about the report's comments on his memory. During a private meeting with House Democrats at their policy retreat in Virginia earlier Thursday, Biden grew especially animated when asked how he was doing.*
>
> *"How the f— could I forget the day my son died? Of course I remember everything," he said, according to two people with knowledge of his remarks who spoke on the condition of anonymity to describe a closed-door conversation.*

The press turned on Joe Biden after Hur's report was released. One reporter suggested Joe Biden should step aside and let another Democrat run for president against Trump.

Joe Biden was not happy about this.

Biden snapped after the reporter asked him about his age and mental acuity.
