Mass Migration Trail From Quito, Ecuador to the United States

In the below video documentary, you will learn how the United Nations is executing an industrial scale weaponized migration program and you will see the entire route that millions of illegal aliens are following to the United States every year!

Global compacts are now being coordinated by the United Nations for a developed strategy for the ultimate goal of eliminating sovereign nations and placing all countries under a one world system of control. This process has been happening in Europe for a least a decade, and is now being implemented for the United States. If not stopped the U.S. will cease to exist and be replaced by populations from underdeveloped or third world countries, ultimately installing a one party system that's subservient to one world elitist power brokers.

The below video jumps forward to the end to point out exactly what's happening to the United States. To watch the entire documentary, move the video progress bar to the beginning of video. The YouTube Video is included as well and imbedded below from X (Twitter) link.
