The Great BIG Takeover

Curtis outlines three areas in which the current BIG Government is accelerating the complete collapse of America. First, they are welcoming hundreds of thousands of illegals into our country each month through the open border. Second, the establishment is looking for the right crisis to confiscate all private property through “The Great Taking.” Third, our leaders have ignored the Chinese threat by funding China’s military build-up and purposefully allowing them to obtain a foothold in our republic. Curtis shares a lot of things to think about as we prepare for uncertain times.
